

## Quickly and Easily Create Multitouch Applications Using **Adobe Flash™** and **Adobe Flex™**

GestureWorks makes creating multitouch applications easy. Developers can author dynamic multitouch applications in Flash CS4/CS5, ActionScript 3, or Flex. It works with virtually any multitouch-capable system that runs Windows 7, and offers features, flexibility, and speed not found in other authoring solutions.

### True Multitouch Development

GestureWorks allows developers to create applications that support multiple, simultaneous gestures. It is the most robust multitouch authoring solution for Adobe Flash, Adobe Air, and Adobe Flex. It is also easy, saving countless hours of development time.

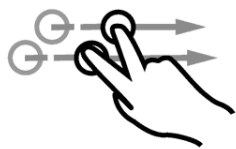

### The Flash Multitouch Authoring Solution for Windows 7

GestureWorks comes complete with its own multitouch drivers for Windows 7, supporting dozens of all-in-one PCs, tablets, and multitouch tables.

### Open Source Gesture Library

The gesture library is built upon an open source gesture framework allowing developers to customize and extend the “gesture object,” creating support for new gestures.

As new gestures become common, they can be easily incorporated, helping to “future proof” your applications.

### 20+ Built in Gestures for Rapid Multitouch Authoring

GestureWorks supports a variety of multitouch gestures including pinch & scale, rotate, drag, scroll, flip/flick, tap, double-tap, and 3D tilt. Gestures can be mapped for multitouch or dual touch systems and customized for any number of touch points in a system.

### Pricing

#### Starting at Just \$99

GestureWorks for Flash and Flex is available for single seat, or site use. Educational pricing begins at \$99\* Commercial licenses begin at \$249

\* Museums, schools, and other non-profits qualify for Educational pricing.

### Contact Us

GestureWorks is owned by Ideum and its employees. We originally developed *GestureWorks* to speed development of our own multitouch & multiuser applications.

Ideum is an Adobe Solution Partner.

If you have questions about custom development, consultation, our other multitouch products, please contact us at: (505)-792-6339 or by email at [contact@gestureworks.com](mailto:contact@gestureworks.com)
